Todd Franke  
Sr. Architect  
Walmart (Bentonville, AR)

“

Can't say exactly what you want Walmart to state. Can say this: "Walmart uses Hydromax siphonic roof drains and continues to use Hydromax roof drains as a part of our building prototype construction documents." In general, Walmart just states the obvious and let's others draw their conclusions, which would be if the World's largest retailer uses this system it must work.

”

### Google Map of all Siphonic Installs

## Walmart Testimonials

Arron Cooper,  
PE, LEED AP BD+C  
Vice President  
Director of Bentonville Operations  
Henderson Engineers Inc.  
(Bentonville, AR)

“

Henderson Engineers, Inc. has designed HYDROMAX siphonic roof drain systems for hundreds of buildings in the United States using the HydroTechnic calculation program. HydroTechnic is an excellent tool that equips the mechanical designer with an understanding of siphonic system operation and provides an excellent graphical interface.

”

“

I used to design Walmarts and Sam's and I know they were very concerned about roof drains from both a cost and liability standpoint and chose siphonic drains when they needed internal roof drains.

”

Brandon Criner  
AIA, LEED AP, CDT, RAS  
Senior Architect  
REES Architecture (Dallas, TX)

(Brandon Criner was Sam's Remodel Prototype Manager from 2006 – 2014: The same time period of Walmart and Sam's record growth. He was the primary contact for maintaining Sam's Remodel Prototype guidelines/drawings while also managing staff.)
